## INTRODUCTION CAPGEMINI

### Your Global Partner

- ➔ Delivered 25+ HCM Assessments within the last 3 years
- ➔ Delivered 1000+ HCM implementations
- ➔ Long-term partnership with Oracle
- ➔ Industry experience across a variety of sectors

#### Consulting Services

**400+**  
OCM & Training Specialists

- Change Wheel + Emotional Cycle of Change
- 55 OCM Accelerators
- Illustrative OCM Roadmap
- ASE (Accelerated Solutions Environment)
- Seasoned Organizational Change Management (OCM) specialists

#### Technology Services

**1000+**  
HCM practitioners globally, including:

- HCM Business Process specialists
- Cloud HCM specialists
- On Premise specialists
- Assessment specialists
- **Certified specialists**

#### Outsourcing Services

**1400+**  
HR BPO practitioners

- Running and managing HR services
- servicing 1M+ Employees in over 160 countries from 11 centers

## Depth of Experience

#### Transformational Experience

Capgemini serves clients globally, bringing certified experience from around the globe.

**40+ countries**

#### Scope Of Services

Capgemini provides end-to-end solutions to transform HCM clients. We strive to "balance" service delivery capabilities with the strategic business priorities of the client.

ORGANIZATION  
Lean and Effective

PROCESS  
Integrated and Efficient

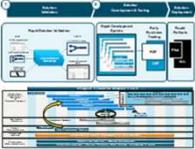

TALENT  
Right Talent, in the Right Place

STRATEGY

Growth and Ambition

#### Implementation Methodology

Capgemini's methodology for transformation solutions help accelerate transformations and drive adoption via early business testing, and rapid, iterative rollouts.

# AGENDA

## Introduction Belgian Defence

1. Belgian Defence at a glance
2. Key objectives HRM@Defence
3. Learning trends
4. How it was

## Oracle Guided Learning

1. What is Oracle Guided Learning
2. Demonstration
3. OGL Analytics
4. OGL within PeopleSoft
5. Advantages OGL
6. Key takeaways & lessons learned

15

15

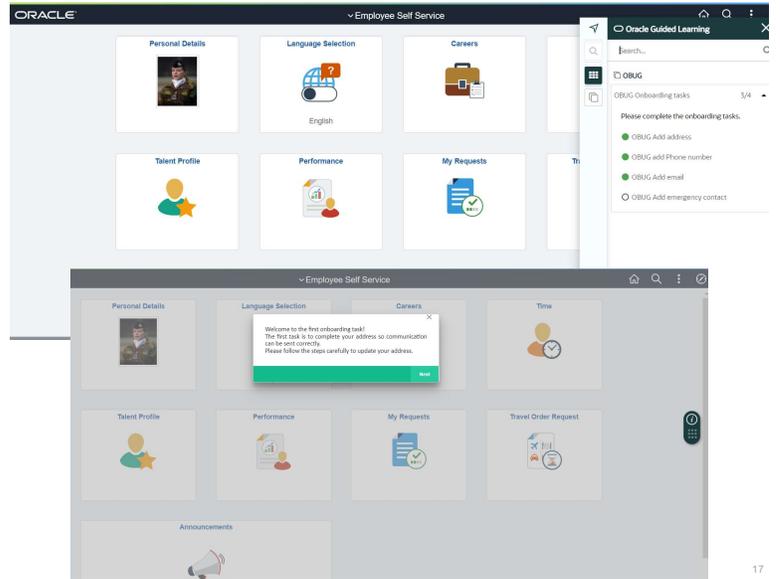

# CAPGEMINI AND ORACLE GUIDED LEARNING

16

16

## WHAT IS ORACLE GUIDED LEARNING?

- Cloud application
- Provides in-application guidance to accelerate adoption by users
- Real time guides and content that are accessible at the point of need of the learner
- Several options and conditions can be used when creating OGL content
  - For example, referring to “object” (e.g. tile) rather than location (e.g. right upper corner)
  - For example role-based conditioning
- Use of analytics to study user behaviour and discover additional needs

17

# DEMONSTRATION

One image says more than a thousand words

18

## DEMONSTRATION

**Bonnie Taylor**

Bonnie is a new employee who has just started her career at Defence. Bonnie will need some help with the first self-service activities she is expected to complete within her first week.

Bonnie needs to modify her personal details, like her home address, e-mail, phone number and emergency contacts. She opens HRM@Defence (PeopleSoft) but has no clue where to begin... There are so many possibilities and information!

19

19

## DEMONSTRATION

**Welcome message**

A welcome message with introductory tour appears when Bonnie logs in for the first time

**Guide home address**

This guide makes use of smart tips to explain the fields that need to be entered

**Guide e-mail address**

This guide will make use of layover to visualize where Bonnie should click

**Task List**

Bonnie launches the task list which includes 4 guides: to add home address, to add phone number, to add e-mail and to add emergency contacts

**Guide phone number**

This guide makes use of beacons to point Bonnie's attention to certain actions within the system

**Guide emergency contacts**

This guide will make use of a splash message to explain the e-mail policy

20

20

## OGL ANALYTICS

- Understand how OGL is being used within organization
- Metric driven insights to optimize processes and user experience
- Feedback
- Top Search Terms
- User activity information
- Hotspots

**Feedback Settings**

Settings

• User Feedback for Guides

Use this application to generate and manage user feedback for guides and to set up the frequency of the feedback forms.

Frequency:  % (Always)  
How often do you wish it to appear (Read more)

Guide Completion:  Show feedback when the user finishes a guide

Rating question:   
Choose a question to help your users rate this guide

Feedback question:

Search Term	Used
pvr	16
p	13
con	10
congé	10
verlor	9

**Dashboard Metrics:**

- Defensie: 15,114 Users
- Defensie: 13,202 Users logged in
- Defensie: 86 Active Users
- Defensie: 3 Avg Active Users

**USERS BY ROLE**

**TOP 5 USERS**

User	Runs
PSBW	66
PSWON	47

21

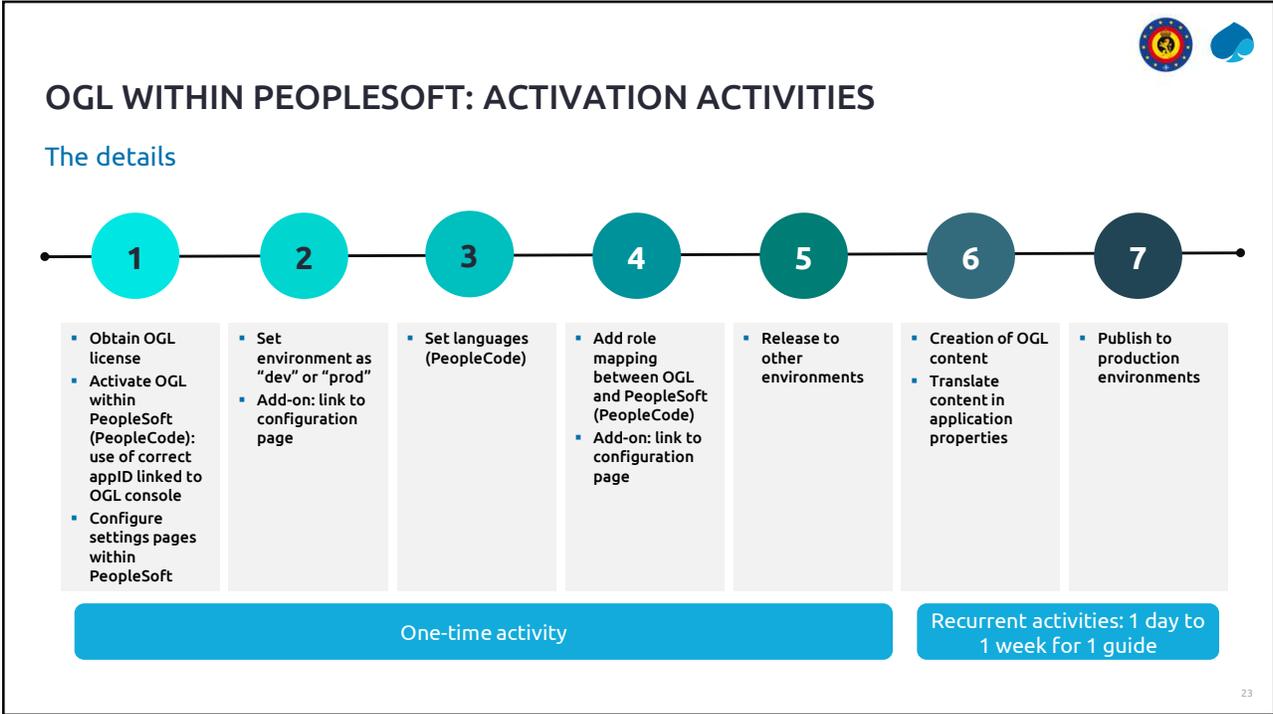

## OGL WITHIN PEOPLESFT

- Oracle guided learning integrated within PeopleSoft
- Only 1 console where OGL content is set up
  - For each separate PeopleSoft environment, you need to set it up as “development” or “production”
  - Draft: content available on development environments (can be multiple)
  - Published: content available on both development and production environments (can be multiple)
- Used across all Oracle Cloud and all PeopleSoft applications: HCM, ELM, CS, ...

```

graph TD
    OGL[OGL] -- draft --> OGL_DEV[OGL DEV]
    OGL -- draft --> OGL_DEV_2[OGL DEV]
    OGL -- published --> OGL_PROD[OGL PROD]
    PS_DEV[PS DEV] --> PS_TST[PS TST]
    PS_TST --> PS_PROD[PS PROD]
    
```

22

23

## OGL WITHIN PEOPLESFT: ACTIVATION ACTIVITIES

The OGL Console

The screenshot displays the 'Employee Self Service' interface for 'Taylor Bonnie'. The 'Personal Details' section is active, showing fields for Name, Emergency Contacts, and various address types (Mailing, BUSN, PRAK, MEDX). A 'Contact Details' window is overlaid, and a 'Step Settings' panel on the right shows a sequence of steps for an OGL activation process.

24

24

## ADVANTAGES OF ORACLE GUIDED LEARNING

**1**

### Personalized & Accessible

- In-application, real-time
- Linked learning material
- Role-relevant knowledge
- Multi-language supported

---

### Communication

- In-app messaging to introduce new processes/workflows
- Answers employees' questions before they are asked

**4**

**2**

### Ease

- Content can be easy and quickly configured or adapted
- Step-by-step, interactive tool
- Coherence with Cloud

---

### Improvement

- Reduces support requests
- Great help for infrequent users or complex tasks
- Modern alternative for training manuals

**3**

25

25

## KEY TAKEAWAYS & LESSONS LEARNED

**Part of roll-out**

Take OGL into account at the start of the project and throughout, use UAT to verify your content

**Categorization**

Make smart use of display groups in order to structure the content in a transparent way for your users. Make use of labels to add additional terms that will deliver a search result.

**Dynamic input**

During activation, the technical team can make use of functional pages where input for OGL can be dynamically changed. This will reduce the dependency on technical support throughout implementation.
