Capgemini's Cloud Readiness Assessment

Today there is tremendous pressure on organizations to improve customer service and supply chain efficiency while reducing IT costs. Moving applications to the Cloud is an attractive option, and is receiving a lot of attention. Many organizations hear a lot about the Cloud, and the value, but are unsure of what it truly means.
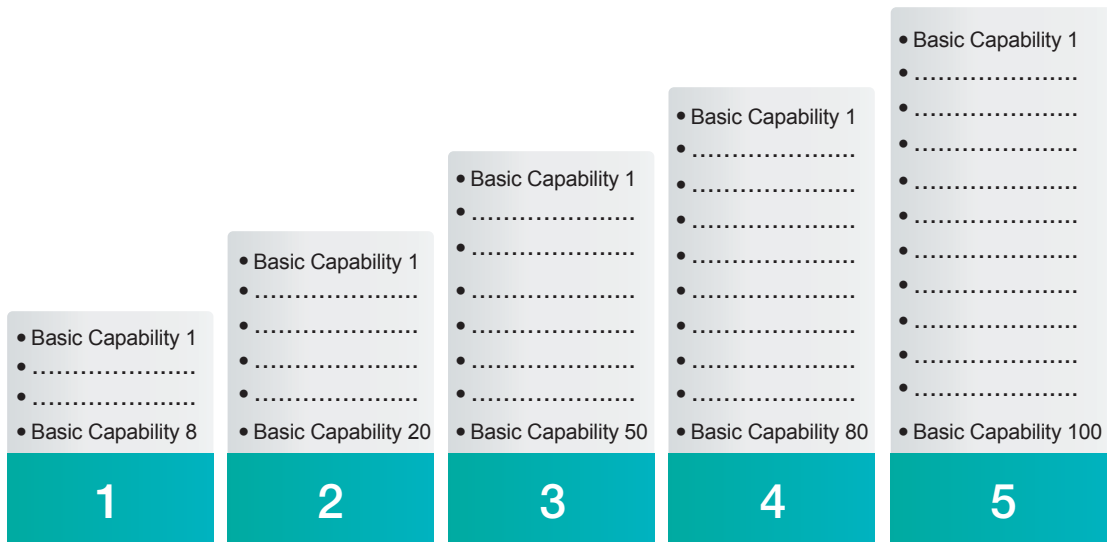

Capgemini's Cloud Readiness Assessment helps customers answer the following questions:
• What is the value to us of migrating to the Cloud?
• What is the cost and the timeline to move to the Cloud?
• What is our specific migration path to the Cloud model?
• What are the best practices that we should adopt?

What are the components of the Assessment?

Survey	Maturity Model	Capabilities	Vision	Bus. Case/ Roadmap

A main part of the assessment is an analysis of where the customer stands on a Maturity model, designed from Capgemini's industry experience.
