Cloud-powered, IoT-enabled workplace safety and productivity

Improve safety and productivity

The steady influx of advanced tool and equipment releases, evolving regulatory requirements, and an increased emphasis on contract work means there are numerous obstacles to ensuring a safe and effective working environment. At a time when many are battling increasing worker incidents, cloud technologies have made it possible to overcome safety and operations challenges. The cloud enables organizations of all types to break free of the constraints of legacy IT and digitally transform their business.
Capgemini's Digital Worker Management

Capgemini's Digital Worker Management (DWM) solution uses cloud-based, wearable technology to help organizations ensure safety, optimize effectiveness, and maximize efficiency – and it can be up and running in as little as four weeks. An IoT-based solution with smart-camera and edge analytics, Digital Worker Management enables real-time worker and equipment tracking, time capture and tracking, proximity alerts, and notifications and surveillance in case of an emergency.
Real-time worker and asset tracking

Time reporting and activity timelines review

Role-based safety alerts and notifications

Video stream focus triggers by zone intrusion or SOS alerts

Live site dashboards with comprehensive reporting abilities

Worker notification broadcast

Digital Worker Management and AWS

Digital Worker Management leverage the benefits of the AWS Platform to provide an out-of-the-box solution that accelerates application development. Capgemini uses the benefits of the AWS platform to build serverless, reactive, scalable, and maintainable digital services. These services are ready to use with minimal changes to ensure flexibility and agility.

About Capgemini

A global leader in consulting, technology services and digital transformation, Capgemini is at the forefront of innovation to address the entire breadth of clients' opportunities in the evolving world of cloud, digital and platforms. Building on its strong 50-year heritage and deep industry-specific expertise, Capgemini enables organizations to realize their business ambitions through an array of services from strategy to operations. Capgemini is driven by the conviction that the business value of technology comes from and through people. It is a multicultural company of almost 220,000 team members in more than 40 countries. The Group reported 2019 global revenues of EUR 14.1 billion..
