

Digital, *meet* physical.

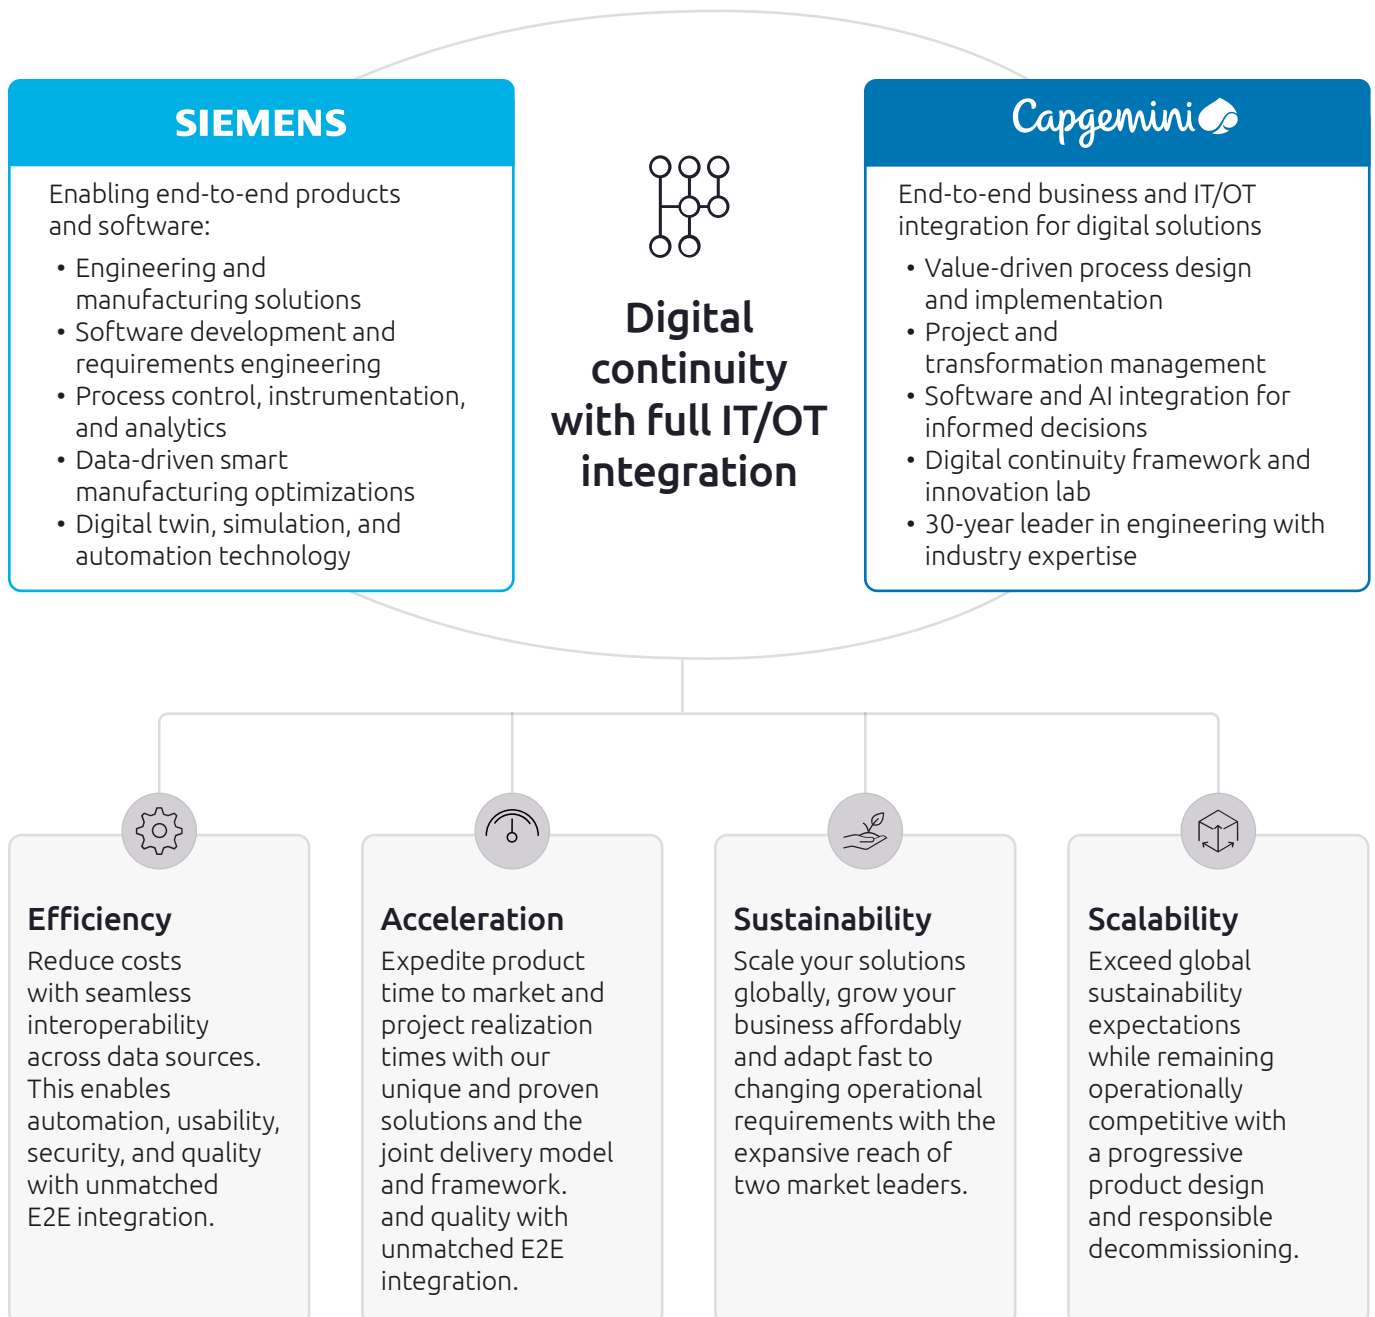

Capgemini  | SIEMENS

Two technology leaders.

Exponential impact.

From product development to smart production, our end-to-end solutions enable digital transformation by creating and driving efficient operations.

Partnership snapshot: Siemens and Capgemini

A symbiotic collaboration

Empowering our customers with relevant technology and intelligent industry solutions.

Together, Siemens and Capgemini provide integrated end-to-end product development capabilities that leverage automation, simulation, data management, and beyond.

15+ years

of partnership focused on helping clients capitalize on opportunities in digital engineering and manufacturing

120+ Customers

in 2024 trusted our partnership to help them achieve their goals

3 pillars of joint focus;

Digital Continuity, Intelligent Products and Engineering, and Intelligent Manufacturing and Operations

Industry-specific propositions

that address specific challenges in the market (e.g., **Gigafactory and Sustainability**)

Strategic position in Siemens Digital Industries ecosystem

of partners which also includes SAP, AWS, Microsoft

Proprietary accelerators

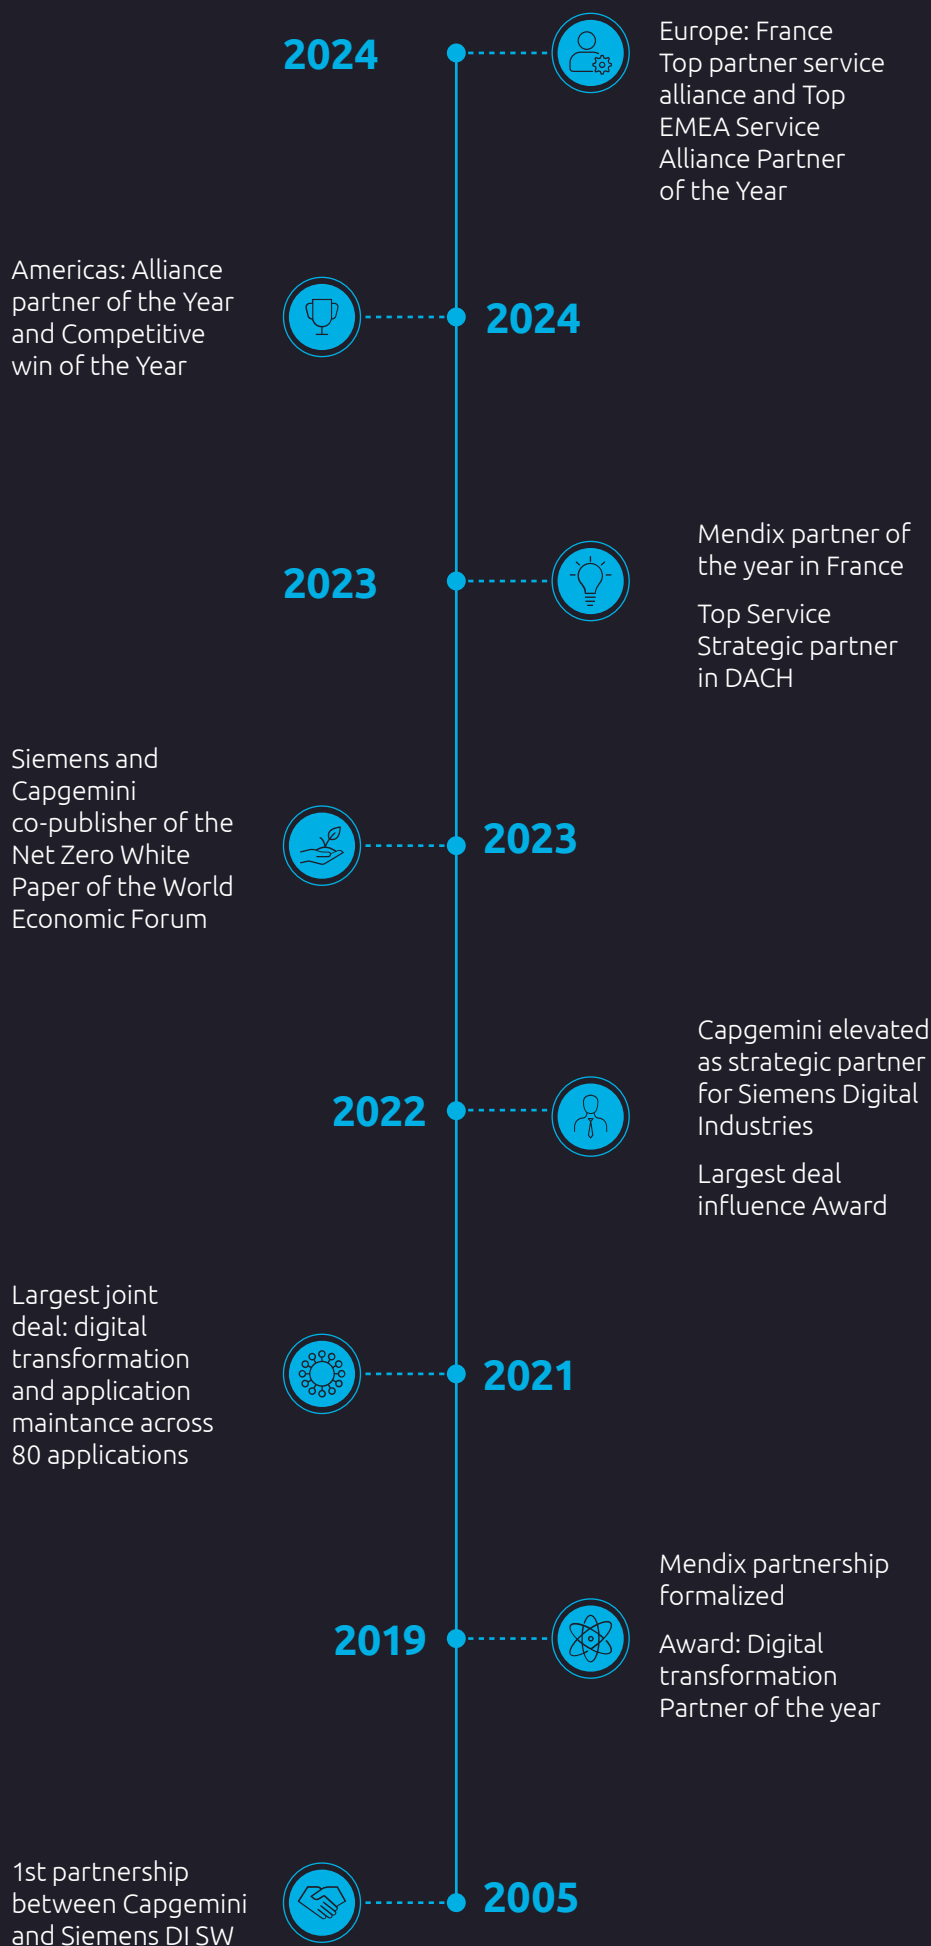

that interface with Siemens DI assets and reduce project time, expense, and risk

Global reach;

Capgemini has delivered projects leveraging Siemens technologies in **20+ countries**

+1.000 experts

spanning Engineering, Digital Manufacturing, and broader lifecycle domains

Three *pillars* of focus in our partnership

A partnership led by *three* essential outcomes

- 1 Digital Continuity
- 2 Intelligent Products and Engineering
- 3 Intelligent Manufacturing and Operation

“

By uniting Siemens' industrial technology leadership in hardware and software with Capgemini's digital integration and consulting experience, we are delivering what industry needs most: seamless digital transformation that drives efficiency, accelerates time-to-market, and ensures sustainable growth. This is more than a collaboration – it's a powerful catalyst for industrial innovation.”

Cedrik Neike

Member of the Managing Board and CEO Digital Industries,
Siemens AG

1

Digital Continuity

Creates value

“

Digital Continuity is about making better products & services, at lower cost with a shorter time-to-market, all driven by consistent information that is complete, integrated and usable within the entire organization & ecosystem.”

Jacques Bacry

Executive Vice President, Digital Continuity & Convergence

2

Intelligent Products and Engineering

Drives innovation

“

As a leader in sustainable breakthrough innovation, we work with clients to co-create next generation products, services and business models that delight customers and disrupt markets. Making the leap towards more intelligent products and services requires companies to transform and innovate by fusing strategy, design, technology, engineering, and data science.”

Nicolas Rousseau

Executive Vice President Intelligent Products Offer Leader

3 Intelligent Manufacturing and Operations

Bridges IT and OT to create new sources of value

“

The new era of manufacturing is here. Whether your organization is focused on discrete or process manufacturing, manufacturers must rapidly adapt in response to changing market demands and technological innovation – while balancing efficient and sustainable operations.

Together we connect operational and digital technology with the engineering of complex products to develop and deliver more intelligent manufacturing.”

Pierre Bagnon

Executive Vice President,
Global Head of Intelligent Industry Accelerator

About Capgemini

Capgemini is a global business and technology transformation partner, helping organizations to accelerate their dual transition to a digital and sustainable world, while creating tangible impact for enterprises and society. It is a responsible and diverse group of 340,000 team members in more than 50 countries. With its strong over 55-year heritage, Capgemini is trusted by its clients to unlock the value of technology to address the entire breadth of their business needs. It delivers end-to-end services and solutions leveraging strengths from strategy and design to engineering, all fueled by its market leading capabilities in AI, generative AI, cloud and data, combined with its deep industry expertise and partner ecosystem. The Group reported 2024 global revenues of €22.1 billion.
